This visit has been organised by Geoff Cockett & Tom Rutherford

### IGHTHAM MOTE

This is an idyllic medieval moated manor house standing in a sheltered wooded cleft of the Kentish Weald. The house is built around an internal courtyard with a semi-fortified gatehouse. The earliest part is 14<sup>th</sup> century, the remainder being completed some 200 years later. Gothic windows pierce ragstone walls and the half timbered upper storey in Tudor “black and white” style, is jettied over the water. The modest pretensions of its successive owners has meant that its appearance has little changed in 400 years. When acquired by the National Trust (NT) in 1985, the building required a £10M conservation programme, completed last year. Our guided tour will see all of the main rooms in their new finery with the Great Hall and the main Tudor chapel occupying pride of place.
