HAMPTON COURT ROOF-TOP TOUR 16 June 2016

This visit has been organised by George Freeman.

In the morning we will have a guided tour of Wren's section of the roof at the palace with the fantastic views over the gardens and park. After lunch in the local pub, we will be taken into the attics of part of Wren's building to see how he managed to get such wide unsupported structures below and see some of the artefacts stored there, including some presents given to the Monarch on their overseas tours. *Please register before 10 June.*

Cardinal Wolsey started building his palace about 1612 but Henry VIII confiscated it in 1620. He carried on building including his Great Hall with its magnificent hammer-beam roof. Most centuries have seen more building, two notable architects being William Kent (George II) and Wren (William and Mary). Kent rebuilt some of the famous west front and parts of the inside. Wren built the Fountain Court and the south and east wings. Inside there are pictures and furniture from these periods and in some rooms there are costume guides who explain the history.

HRP (Historic Royal Palaces) runs roof-top tours over of Wren's part of the palace. Access is via a long steep stone staircase with iron banisters (probably made by Tijou as he was Wren's master blacksmith). On the roof there are steel walkways over the leads. The views of the old roofs, S & E gardens and park are unrivalled.

After lunch, Lee Prosser (a curator) will take us into one of the attics to see the structure of the building and some of the treasures stored there.

In the morning, the size of a group is a maximum of 12. We will have two groups starting at 11:00 and 12:00

SAFETY Please do not come with us if you have difficulty climbing stairs or suffer with vertigo. Please wear sensible flat shoes and, if sunny, a sun hat as it gets hot up there.
